Expert Networking Support you can Trust

Our organization's central service is providing quality networking services and support at highly competitive prices.

We support the entire family of Microsoft Server products with a focus on Microsoft's NT/2000/2003 Server and Exchange 2000/2003 Server. We also support LINUX, NOVELL, SGI, DOS, APPLE, and Multi-Platform systems.

Sky Computer Services's migration, integration, update and administration services include: planning and system design, installation and deployment, relocation and business expansion, project management and documentation, on-site and remote technical support and troubleshooting, help desk services, expert security consulting, and turn-key outsourcing.

Free Network Assessment

Do you wish to know where network problems might arise at a in the future and how to avoid them? Would you like to know how to prevent unauthorized access to your network? Contact us today to schedule a FREE assessment of your network, and learn more about our Support Plans, which improves your network's reliability at a greatly reduced cost.

Call **310-837-2525** for an appointment.

We love that you guys deal w/ all aspects of computers - from networking to specific databases [development], to website [integration]. . . Everyone has been great" Rachel, WMTC, Inc. Calabasas

"Competent cross-platform onsite technical support" David Tolson, Simply Digital, Santa Monica
